

TECHNICAL DATA SHEET

Ramp for Spill Containment Decks

Product Introduction:

 Udyogi spill containment Deck ramp is an essential accessory designed to facilitate the safe and efficient loading and unloading of 210-liter oil and chemical drums, containers, and other similar drums onto spill containment Decks.

Features:

- Rust and Corrosion Resistance: Suitable for a wide range of chemicals, chemical resistance including oils, acids, and solvents, and a durable, robust construction with a thicker structure providing added strength, these products securely handle the loading and unloading of fully-loaded oil and chemical drums.
- Non-Slip Surface: Textured, non-slip surface to enhance traction and reduce the risk of slips and falls.
- Easy Integration: Compatible with a wide range of spill containment Decks and simple setup.
- Edge Guards: Guide drum trucks and help prevent them from rolling off the sides.

Product Specifications:

Model:SCDPMP15Construction:Polyethylene.Type:Ramp for Decks.

Colour : Yellow. **Load Capacity :** 500 KGS.

Dimensions CM:120 x 800 x 15 (L x W x H).Dimensions MM:1200 x 800 x 150 (L x W x H).Compatibility:150MM / 15CM Height Spill Decks.

Application:

 Safe Loading and Unloading: Ramps facilitate the safe and efficient loading and unloading of spill containment Decks, allowing for the easy movement of drums or containers onto and off of the Decks.

Storage:

 When not in use, the ramp can be stored in a designated area away from traffic or potential damage.

Benefits:

- Enhanced Safety: Reduces the risk of spills, slips, and falls during material handling.
- Operational Efficiency: Facilitates the smooth and efficient loading and unloading of drums and containers.
- Regulatory Compliance: Helps facilities comply with safety and environmental regulations.
- Cost Savings: Minimizes cleanup costs and reduces the risk of costly accidents and environmental damage.

Usage Instructions:

- Placement: Position the ramp securely at the edge of the spill containment Deck, ensuring it is stable and aligned for safe loading and unloading.
- Alignment: Verify that the ramp is properly aligned with the surface it is connecting to, such as the ground or a loading dock.
- Safety Precautions: Before use, inspect the ramp for any damage that could compromise safety.
 Ensure there are no obstacles in the path of the ramp.
