Ramp

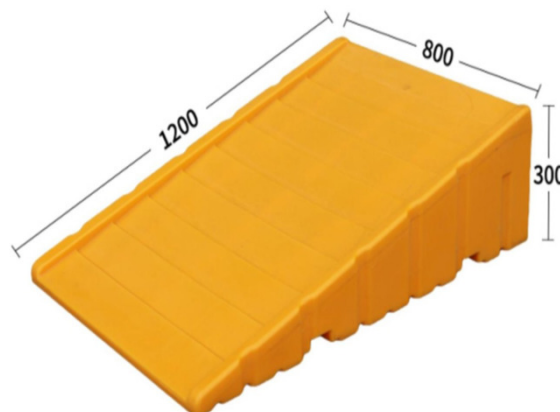

Ramp for Spill Containment Pallets

Product Introduction:

- Udyogi spill containment pallet ramp is an essential accessory designed to facilitate the safe and efficient loading and unloading of 210-liter oil and chemical drums, containers, and other similar drums onto spill containment pallets.

Features:

- Rust and Corrosion Resistance:** Suitable for a wide range of chemicals, chemical resistance including oils, acids, and solvents, and a durable, robust construction with a thicker structure providing added strength, these products securely handle the loading and unloading of fully-loaded oil and chemical drums.
- Non-Slip Surface:** Textured, non-slip surface to enhance traction and reduce the risk of slips and falls.
- Easy Integration:** Compatible with a wide range of spill containment pallets and simple setup.
- Edge Guards:** Guide drum trucks and help prevent them from rolling off the sides.

Benefits:

- Enhanced Safety:** Reduces the risk of spills, slips, and falls during material handling.
- Operational Efficiency:** Facilitates the smooth and efficient loading and unloading of drums and containers.
- Regulatory Compliance:** Helps facilities comply with safety and environmental regulations.
- Cost Savings:** Minimizes cleanup costs and reduces the risk of costly accidents and environmental damage.

Product Specifications:

Model :	SCDPMP30
Construction :	Polyethylene.
Type :	Ramp for Pallets.
Colour :	Yellow.
Load Capacity :	500 KGS.
Dimensions CM :	120 x 800 x 30 (L x W x H).
Dimensions MM :	1200 x 800 x 300 (L x W x H).
Compatibility :	300MM / 30CM Height Spill Pallets

Application:

- Safe Loading and Unloading:** Ramps facilitate the safe and efficient loading and unloading of spill containment pallets, allowing for the easy movement of drums or containers onto and off of the pallets.

Storage:

- When not in use, the ramp can be stored in a designated area away from traffic or potential damage.

Usage Instructions:

- Placement:** Position the ramp securely at the edge of the spill containment pallet, ensuring it is stable and aligned for safe loading and unloading.
- Alignment:** Verify that the ramp is properly aligned with the surface it is connecting to, such as the ground or a loading dock.
- Safety Precautions:** Before use, inspect the ramp for any damage that could compromise safety. Ensure there are no obstacles in the path of the ramp.
