

TECHNICAL DATA SHEET

SCWST20 Spill Tray

Spill Containment Workstation Tray

Product Introduction:

- Udyogi Spill Containment Workstation Tray, meticulously engineered to offer a secure and efficient solution for containing spills in industrial and laboratory environments.
- Crafted with precision and durability, workstation tray provides a reliable barrier against spills from oil or chemical drums, ensuring workplace safety and environmental protection.

Features:

- Rust and Corrosion Resistance:** Suitable for use with a wide range of chemicals, oils, acids, and solvents.
- Construction:** Durable, robust construction and thicker side borders structure provide added strength, allowing them to securely store fully-loaded small drums and containers.
- Removable and Anti-Skid Grates:** Easily lifted out for quick access to cleaning, and decontamination purposes.
- Surface:** Non-slip surface to prevent accidents.
- Drainage Plug System:** Equipped with a built-in drainage system for easy spill removal and cleanup.
- Spill Containment:** Designed to contain spills and liquid leaks from small drums and containers.

Benefits:

- Spill Prevention:** Contains spills and leaks, preventing them from spreading and causing contamination or safety hazards.
- Cost-Effective:** Minimizes clean-up time, material waste, and costs associated with spills and leaks.
- Regulatory Compliance:** Helps facilities comply with regulatory requirements for spill containment and management.
- Safety Improvement:** Reduces the risk of slips and contamination, keeping the workplace clean and dry.
- Environmental Protection:** Prevents hazardous substances from spilling onto workstation areas.
- Efficient Spill Management:** Facilitates quick and effective containment and cleanup of spills, minimizing downtime and disruption to operations.
- Protection of Equipment and Inventory:** By containing spills, it helps protect valuable equipment, inventory, and other assets from damage.

Product Specifications:

Model :	SCWST20
Construction :	Polypropylene.
Type :	Workstation Tray.
Sump Capacity (Gallon) :	5.28 Gal.
Sump Capacity (Liter) :	20 Ltr.
Colour :	Yellow Base & Black Grate.
Grate :	Two.
Drum Hold Capacity :	Small Drums & Containers.
Load Capacity :	80 KGS.
Forklift Accessible :	No.
Dimensions CM :	67.5 x 37.5 x 12 (L x W x H).
Dimensions MM :	675 x 375 x 120 (L x W x H).
Drain Key / Plug :	Yes.

Spill Containment Workstation Tray

Application:

- **Liquid Storage:** Safely contain spills and leaks from small drums and containers storing hazardous chemicals, oils, and many other liquids.
- **Dispensing Stations:** Provide a secure platform for dispensing liquids from small drums while containing any accidental spills.
- **Battery Charging Stations:** Contain leaks from batteries being charged, preventing acid and other hazardous materials from contaminating the floor.
- **Maintenance Areas:** Capture spills from maintenance activities involving oils, lubricants, and other fluids.
- **Waste Storage:** Temporarily store hazardous waste materials in small drums and containers, ensuring any leaks are contained.
- **Laboratories:** Contain spills from chemicals and other hazardous materials used in research and testing.
- **Automotive Workshops:** Collect and contain oils, lubricants, and other fluids.
- **Agricultural Sector:** Contain, dispense, and mix pesticides, fertilizers, and other liquid chemicals.

Industry:

The spill containment workstation trays are essential for maintaining a clean, safe, and efficient working environment in any industry that utilizes small drums for liquid storage, handling, mixing, and dispensing.

Safety Information:

- **Handling:** Wear mechanical & chemical-resistant gloves suitable for the specific chemicals being handled.
- **Eye Protection:** Use safety goggles or a face shield to protect your eyes from splashes and spills.
- **Protective Clothing:** Wear a chemical-resistant clothing to protect from spills and splashes.
- **Respiratory Protection:** Use appropriate respirators if there is a risk of inhaling hazardous Gas or vapours.

Usage Instructions:

- **Placement:** Position the spill containment workstation tray on a flat, stable surface in your working area. Ensure the tray is easily accessible and situated where liquid handling, mixing, or dispensing occurs.
- **Loading:** Place small drums or containers on the tray, ensuring they are centered and stable. Avoid overloading the tray to prevent spills or tipping.

Storage:

- Store the tray in a cool, dry place away from direct sunlight, heat sources. Choose a location that is easily accessible for future use but protected from physical damage. Positioning: Store the tray flat to prevent warping or bending.
